EDUCATION

Chandigarh University   Mohali, India
CGPA 7.1   *August 2020 – May 2024*

New RSJ Public School   Prayagraj, India
CBSE Board   *2019 – 2020*

TECHNICAL SKILLS & TOOLS

Skills: C/C++ | HTML5 | CSS | Tailwind CSS | React.js | React Native | PHP
Tools: ChatGPT | MS Word / MS Excel | Git/GitHub

WORK EXPERIENCE

Carfax Commodities   April. 2024 – Present
React-native developer   *New Delhi, INDIA*

- Developed reusable components for faster development and improved code maintainability also Integrated APIs and utilized JSON files to represent and manage data across various projects, ensuring efficient data retrieval and manipulation. Demonstrated proficiency in handling data interchange between frontend and backend components

- Developed and implemented user authentication in a React Native application using Appwrite, enabling secure and scalable user management. Integrated email/password sign-up, login, and session handling, enhancing overall app security and user experience.

- Developed and implemented user authentication in a React Native application, including secure OTP generation and sending using JavaScript. Integrated email/password sign-up, login, and session handling, significantly enhancing app security and user experience.

InternPixel   Feb 2024 – April 2024
Software developer   *Remote*

- created and maintained web pages with JavaScript, HTML, and CSS to ensure optimal functionality and responsiveness on various browsers and devices.

- ● Launched a custom React.js application for customer feedback collection, now utilized by over 10 departments, providing actionable insights that drove product improvements and enhanced user satisfaction across the organization

- Implemented interactive features, state management, and animations using React.js to improve usability and overall website performance.

- Collaborated with the design team to translate mockups and wireframes into fully functional web interfaces, adhering to design specifications and accessibility standards.

PROJECTS

Vibe Tune: A music App   November 2023 – January 2024

* **User Authentication :** Implemented secure user authentication using React and JavaScript to ensure user data privacy and account management functionality.
* **Search and Playback :** Integrated search functionality using JavaScript to enable users to discover and play their favorite tracks seamlessly.
* Received positive feedback from established brands like Buffalo Wild Wings for innovative sauce holder designs.
* **Responsive Design :** Ensured cross-device compatibility and responsiveness through HTML, CSS, and media queries, enabling users to access the platform on desktop, tablet, and mobile devices without compromising the user experience.

EXTRA CURRICULAR ACTIVITY

· **Cricket:** Playing cricket has strengthened my teamwork, strategic thinking, and leadership skills, which I apply in software development to manage projects and solve problems effectively.
